la ciudad de tar

"la ciudad de tar" is a work inspired by alejandro jodorowsky's film "fando y lis". this is a film that focused on journeys, destinations, expectations and disappointments. these are the subjects that the artist wanted to articulate on this work after the strong impression that this controversial and groundbreaking film left on him. the compositional narrative and the sonic textural treatments were the main formal considerations that the artist focused on during the making this work.

jukka vakkinen-kannonen

"la ciudad de tar" was composed during 2008 and 2009 between nyc and bogotá, colombia. thanks to richard garet, lina, juan José calarco, pedro leit, and james mcdougall.
